

POWDER METALLURGY

Across

- 7. Number of steps involved in powder metallurgy**
- 8. Filling of pores through a liquid**
- 9. Giving shape to the powder metallurgy**
- 10. The second step of powder metallurgy**

Down

- 1. When oxides,carbides etc get converted into powders**

- 2. Rotation of solid metal under centrifugal force**

- 3. The process in which you force the powder through a die**

- 4. Method used for getting powders of carbonyls**

- 5. Converting molten metal to powder**

- 6. Heating of the metal below it's melting point**
