# PSYCHOLOGY

## **Across**

- 2.** a thick bundle of nerves fibres connecting the two hemispheres of the brain, allowing them to communicate.
- 7.** a memory condition that affects recall of memories prior to a injury to the brain.
- 8.** the extent to which the findings still explain the behaviour in real life situations.
- 9.** mental representations of the world based on one's own experiences.
- 10.** the behaviour of following what the majority are doing, yielding to group pressure.

## **Down**

- 1.** chemicals within the nervous system that pass messages from one neuron to another across a synapse.
- 3.** the area at the top of the brain that play a part in our perception and sensations of touch.
- 4.** known as 'face blindness' is an inability to recognise faces.
- 5.** the area at the back of the brain that controls vision.
- 6.** theories that view anything as part of human nature.
