

# Parts of Circles Crossword

**Across**

- 2. An arc of a circle having measure greater than or equal to (radians)
- 4. A straight line that cuts a curve in two or more parts
- 6. A straight line that touched the curve from outside the circle
- 7. A straight line segment who's endpoints are both in the circle
- 8. A straight line in a circle from the center to the circumference

- 10. An arc of a circle having measure less than or equal to (radians)
- 11. A closed segment of a differentiable curve
- 12. What is a round plane in which a center point is equidistant from the circumference
- 13. A line that runs from one end of a circle to the other in a straight line

**Down**

- 1. The point where the tangent line touches the circle
- 3. Two chords that share an endpoint which forms the vertex. The other endpoints form the intercepted arc
- 5. An angle with endpoints on the circumference and the vertex in the center, it also determines the Arc.
- 9. Half of a circle or its circumference
