

Name: _____

Date: _____

Parts of Plants and Animal Cells

Across

- 5. Makes ribosomes
- 8. transport proteins to the golgi body
- 10. Passage of materials in and out of cell
- 11. Uses energy from sun to create glucose

- 12. Packages and transports proteins
 - 13. Where proteins are made
- ## Down
- 1. Contains DNA
 - 2. Produces energy
 - 3. Provides strength for cell and shape

- 4. Breaks down material
- 6. water storage
- 7. Provides rigid structure and protects a plant cell
- 9. Everything inside the cell membrane except the nucleus
