

Patterns in the Natural World

Across

2. the change of water from one state to another as it moves between earth's surfaces to the atmosphere
 3. water that seeps below ground into the water table or soil spores
 4. the process of water changing from a liquid to water vapor by adding heat
 8. day to day conditions of the atmosphere in an area
 10. water that falls from the sky as rain, snow, sleet, or hail

11. usual or average

13. a border separating two masses of air of different densities

14. the passage of water vapor from a plant to the atmosphere

15. the atmosphere of our planet is pressing down on us

16. the process of water changing from water vapor to a liquid by loss of heat

Down

1. the air that surrounds the Earth; it is made of a mixture of gases

5. how hot or cold something is

6. the variety of ways by which water moves across the land

7. the amount of water vapor in the air

9. general pattern of weather in an area over a long period of time 30 or more years

12. a large body of air with similar temperature and moisture properties throughout
