

Pediatric Dentistry

Across

3. Puberty takes place in this stage
6. This is the period of socialization, which involves learning to "get along"
8. Any signs of this should be reported immediately
9. These treatments allow dentists to prevent or eliminate irregularities
10. During this period children learn to sit, stand, walk, and run
11. This is a clear or shaded plastic substance used to protect fissures and developmental grooves from decay

Down

1. This is when children, if handled well, build a bond of trust
2. This is the child's actual age in terms of years and months
4. This describes the child's level of emotional maturity
5. This refers to the child's level of intellectual capacity and development
7. The child has gone through autonomy and initiative. Then, begins learning how to keep control and structure in their life
