

People and the Biosphere

Across

- 2. secondary consumer
- 3. pale coloured with small air gaps. water drains easily.
- 4. primary consumer
- 8. precipitation
- 14. store carbon by removing carbon dioxide from atmosphere and locking it up in biotic material
- 16. large scale ecosystem
- 17. tropical grasslands
- 18. close to the sea
- 20. primary producers

21. non living - soils rock water and air

22. light brown, quick drainage

Down

- 1. orange sticky soil with few air gaps. water does not drain easily
- 5. does not contain rock particles as it consists of decaying plants
- 6. localised biome made up of the connection between biotic and abiotic things

7. very hot all year round but cool nights. very low rainfall

9. what nutrient does weathering of rock promote (2)

10. what nutrient does weathering of rock promote (1)

11. coldest biome

12. = distance from sea

13. how far north or south a location on earth's surface is from the equator

15. living - fauna and flora

19. narrow zone of low pressure near equator
