

Name: _____

Date: _____

Perimeter and area

Across

- 4. A shape which has one pair of parallel sides called the bases
- 8. Measure on all sides are the same
- 10. The path of all the points that are equidistant from a fixed point on a given surface
- 14. How tall the shape is
- 15. The units around the shape
- 17. A square with a side length of one unit
- 19. A shape with more shapes than one

20. a simple quadrilateral whose four sides all have the same length.

Down

- 1. The amount of surface and 2d shape covers measured in square units
- 2. An equation that shows the relationship between two or more quantities
- 3. Distance around the circle and is 3x bigger than the diameter
- 5. Something that is likely to vary

- 6. Any side of parallelogram or triangle from vertex to base
- 7. Intersect to form right angles
- 9. A centimeter block
- 11. Half the diameter, a segment that connects the center to the circle
- 12. The total distance around a 2d shape
- 13. A segment that has endpoints on the circle
- 16. A tip of a triangle
- 18. The units inside the shape
