

Name: _____

Date: _____

Periodic Table #5

Across

- 4. Has the symbol Th
- 8. Has a melting point of 575.6 degrees Fahrenheit
- 11. Has the atomic number 66
- 12. Has the atomic number 68
- 16. Has a melting point of 1,962 degrees Fahrenheit
- 17. Has the atomic number 58
- 18. Has the symbol Yb

19. Was discovered by Swedish chemist Per Theodor Cleve

20. Has a melting point of 2,854 degrees Fahrenheit

Down

- 1. Has the atomic number 63
- 2. Has the atomic number 89
- 3. Has a melting point of 1,861 degrees Fahrenheit
- 5. Has the symbol La

6. Has a melting point of 1,708 degrees Fahrenheit

7. Has the symbol Gd

9. Has the atomic number 93

10. Has a melting point of 3,025 degrees Fahrenheit

13. Has 92 protons and 92 electrons

14. Has the symbol Tb

15. The thirteenth element in the Lanthanide series
