

Personality

Across

2. The mind's storehouse of values including moral attitudes learned from parents and from society

3. An emotion proposed by Karen Horney that gives a sense of uncertainty and loneliness in a hostile world and can lead to maladjustment

6. The psychological qualities that bring continuity to an individual's behavior in different situations and at different times

8. A personality descriptor indicating the quiet and reserved nature of some individuals

10. A feeling of inferiority that is largely unconscious with its roots in childhood

11. Susceptibility to neurotic problems

Down

1. The ancient memory images in the collective unconscious

4. An attribute of a psychological test that actually measures what is being used to measure

5. A personality descriptor indicating the outgoing nature of some individuals

7. The conscious rational part of the personality charged with keeping peace between the superego and the id

9. A disorder in which a person has an inflated sense of self importance

12. The primitive unconscious portion of the personality that houses the most basic drives and stores repressed memories
