

Petroleum Liquids & Gases

Across

2. High concentration of H₂S
5. Main component of natural gas
6. Contains large amounts of LPG (3 words)
7. Pentane and heavier HC
8. Produced when volatile HC are dissolved in crude oils under pressure (2 words)

Down

1. Contains only a small amount of LPG and condensate (3 words)
3. Low concentration of H₂S
4. Needs to be processed to meet the conditions of purchase contract (2 words)
9. Liquefied petroleum gas
10. Less than 0.5 % H₂S
