

# Pharmacology Classifications

1. Viral Vaccines
  2. Monoclonal Antibodies
  3. Immune Modulators
  4. Leukotriene Receptor
  5. NSAIDs
  6. GI-Stimulants
  7. Chemical Laxatives
  8. Digestive-Enzymes
  9. Prostaglandin
  10. PPIs
  11. Antacids
  12. Intermediate Insulins
  13. Short Insulins
  14. Rapid insulin
  15. Calcitonins
  16. Antihypocalcemic
  17. Antihypercalcemic
  18. Antithyroid Agents
  19. Thyroid Hormones
  20. Mineralocorticoids
  21. Glucocorticoids
  22. Antidiuretic Hormone
  23. Growth Hormone Antag
  24. Growth Hormone
- A. methimazole
  - B. regular insulin
  - C. desmopressin
  - D. sodium bicarbonate
  - E. rituximab, trastuzumab
  - F. misoprostol
  - G. lispro, aspart, glulisine
  - H. omeprazole, esomeprazole
  - I. levothyroxine
  - J. bromocriptine mesylate
  - K. montelukast, zafirlukast
  - L. pancrelipase
  - M. ibuprofen, naproxen
  - N. alendronate, risedronate
  - O. metoclopramide
  - P. calcitonin salmon, fortical
  - Q. calcitrol, teriparatide
  - R. MMR, Influenza A
  - S. somatropin
  - T. isophane insulin
  - U. fludrocortisone acetate
  - V. prednison, hydrocortisone
  - W. fingolimod, lenalidomide
  - X. castor-oil, bisacodyl
