

Phosphorus Cycle

Across

1. Phosphorus in soil can end up in
5. Phosphate can be made available to plants by bacteria that break down organic matter to inorganic forms of phosphorus, is called
6. Atomic number
8. Phosphorus returns to the soil when an animal or plant
10. Causes rocks to release phosphorus

Down

2. Phosphorus is incorporated into organic molecules such as
3. Plays a critical role in cell development
4. Phosphorus can be in incorporated into
7. Chemical Symbol
9. From where the plant takes up inorganic phosphorus:

Word Bank

DNA	Soil	decays	Weathering
mineralisation	Sediments	15	Waterways
P	Phosphorus
