

# Photosynthesis

## Across

2. the waste gas released from a plant's leaf
7. an organism that produces its own food
9. the source of radiant energy for photosynthesis
12. the sugar that is created by plants
13. an organism that eats only other animals

14. the type of energy that is produced by glucose

## Down

1. the process of how plants harness sunlight into energy
3. the nutrient gas taken into a plant's leaf
4. the organelle that captures sunlight in a plant cell

5. an organism that eats plants and animals
6. an organism that eats other organisms for energy
8. the type of energy that comes from the sun
10. the nutrient taken in by plant roots
11. an organism that eats only plants
