

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# Photosynthesis

## Across

2. There are autotrophs and \_\_\_\_\_?
6. What type of plants are found in hot and dry climates?
8. Where are photosystems located in the chloroplast?
9. What does PS II stand for?
10. What is the light that we can see called?

## Down

1. The three phases of the Calvin Cycle are reduction, regeneration, and \_\_\_\_\_?
3. What cycle happens in the stroma of the chloroplast?
4. The Calvin Cycle does not release what?
5. The light reactions include light-dependent and light-\_\_\_\_\_
7. Carbon dioxide, sunlight and \_\_\_\_\_ are needed for photosynthesis to occur?
