

Physical Features of the World

Across

- 1. What is the level above the seas surface?
- 4. What is the original point from which the over flows?
- 8. What is a group of islands closely scattered in a body of water?
- 9. What is the area of relatively level high ground?
- 11. What is a recessed, coastal body of water that directly connects to a main body of water?
- 12. What is the narrow strip of land that connects two larger land masses and separates two bodies of water?
- 16. What is the large inlet from the ocean into the landmass, typically narrow opening than a bay?

- 17. What is the piece of land surrounded by water or protecting out into a body of water?

- 19. What is the flat sweeping landmass that generally doesn't change much in elevation?
- 20. What is the part of a river where the river debouches into another river, reservoir, lake, sea, or ocean?

Down

- 2. What is a gentle slope leading from the base of mountains to a region of flat land?
- 3. What is the area of seabed around a large landmass where the sea is relatively shallow compared with the open ocean?
- 5. What is the part of a river where the river debouches into another river, reservoir, lake, sea, or ocean?

- 6. What is a river or stream flowing into a larger river or lake?

- 7. What is the area or ridge of land that separates waters flowing too different rivers, basins, or seas?

- 10. What is a low area between hills or mountains typically with a river running through it

- 13. What is the body of water along the shore deep enough for anchoring and a ship?

- 14. What is the fertile spot found in a desert, where water is found?

- 15. What is the imaginary line between two parallel rivers, at the point where rivers plunge or fall roughly at the same elevation?

- 18. What is a narrow waterway joining two larger bodies of water?
