

Physics

Across

2. In a test you have to evaluate the ...
 8. The wave used for mobile phone communications
 9. The wave with the shortest wavelength
 11. The wave too short for the human eye to see
 14. The wave used in hospital to view internal body parts

15. What is something that absorbs radiation

16. What happens to the frequency from radio to gamma

Down

1. What does the temperature need to be to be a fair test
 3. The type of wave which can burn your skin
 4. Surface that absorbs all radiation on it

5. The only type of wave which a human eye can see

6. What is happening to the wavelength from radio waves to gamma rays

7. When something is balanced

10. What do insulators do

12. When you give out light

13. The type of wave with the longest wavelength
