

# Piaget

## Across

3. You can't see things from others' perspectives  
 10. Children develop in a series of stages  
 11. You can break down thoughts and ideas and analyze them

## Down

1. Stage where children begin thinking logically  
 2. The awareness that objects continue to exist when not perceived  
 4. The stage where we gain hypothetical thought and formal operational thinking

5. The mental activities associated with thinking, knowing, remembering, and communicating.

6. Principle that quantity remains the same despite changes in shape

7. Stage where children can use words and images to convey thoughts

8. We recognize people as having their own set of experiences, thought processes, and knowledge

9. Stage where children live through their senses
