

Name: _____

Plant Cell Organelles

Across

- 5. reads DNA and makes ribosomes
- 6. goo inside the cell
- 9. moves proteins throughout the cell
- 10. takes unwanted things out of the cell
- 11. cell headquarters; holds DNA

Down

- 1. makes glucose during photosynthesis
- 2. makes energy during cellular respiration
- 3. tiny balls that give protein to the cell
- 4. surrounds and protects the cell
- 7. surrounds the cell and is surrounded by the cell wall
- 8. holds the cell's supply of water
