

Plant Diversity grade 11 Life sciences

Across

- 1. Structure that forms spores in mosses
- 5. Seedless group of plants
- 6. Allows for support in plants
- 8. Equivalent to seed
- 10. Protective covering of seeds
- 12. Asexual generation

13. Is a pollinator

- 15. Develops from a zygote
- 17. Flowering plants
- 18. Found in ovary
- 19. Sexual generation

Down

- 2. Shows evolutionary relationships in organism
- 3. Bryophytes lack this tissue

4. Energy reserve for seeds

- 7. Zygote cell is through...
- 9. Where seeds are stored
- 11. Type of roots found in bryophytes
- 14. Prevents water loss
- 16. Female spores produced by conifers
