

# Plant Transport

## Across

3. water moves against gravity through
6. what is the process by which water evaporates from the leaves which causes water being drawn up from the roots
7. what do xylem vessels contain
9. what feature is involved with reducing excessive water loss
10. a factor that affects the transpiration rate

## Down

1. what do phloem vessels consist of
2. what method of transport is used to absorb minerals
4. what are phloem vessels involved in
5. what does the phloem transport
8. what transports water and solutes from the roots to the leaves
