

Plant and Animal Cell

Across

1. It does the energy production

3. Plays role in digestion and is a membrane-bound sac

7. Like the Cell wall but it's the second guard layer

12. It's green and can be found in a plant cell not an animal cell

14. Stores protein; a single membrane

15. Only found in animal cells; part of the cytoskeleton

16. Layer on the outside; In plant cell not in animal cell

17. Vesicle; "Transport of cargo"

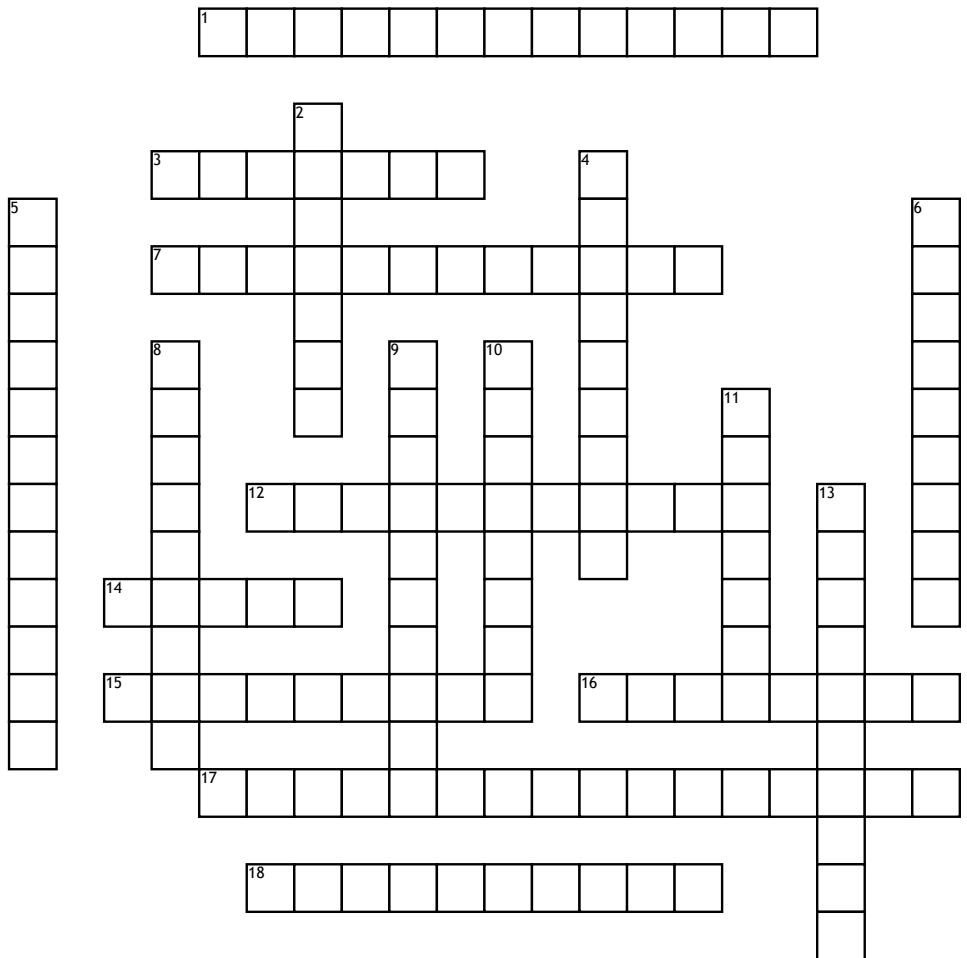

18. Microtubules are produced; yellow and starts with a C

Down

2. Like the brain of the cell

4. A cell that does have a cell wall and a chloroplast

5. Helps maintain cell shape"; 3 parts- microtubules, actin filaments, and intermediate fibers

6. The circle inside of the nucleus

8. Little black dots that are on the Rough Endoplasmic Reticulum

9. Protecting the cell from its own production

10. Common in animal cells; red circles

11. Made mostly of water and another name for it is Cytoplasm

13. A cell that doesn't have a cell wall or a chloroplast
