

Plant and Animal cells

Across

- 2. Holds organelles
- 8. Makes proteins
- 9. Controls in and out movement
- 10. Boss of the cell, holds the DNA

Down

- 1. Produces energy through minerals and chemicals

- 3. Moves materials in the cell
- 4. A large storage unit for water and other minerals
- 5. Photosynthesis
- 6. This organelle is like a garbage disposal
- 7. Supports and protects cell, makes the shape of the cell
