

Name: _____

Plate Tectonics

Across

- 5. Device used to record an Earthquakes seismic waves
- 6. Ground vibrations caused by Earth's crust moving
- 8. A theory stating that the continents drifted apart
- 9. A spot in the Earth's mantle where hot magma rises to the surface

Down

- 10. Energy waves travelling out from an Earthquake
- 11. Type of boundary between two colliding plates
- 12. Type of boundary between two plates moving away from each other
- 13. A piece of Earth's crust that moves atop the mantle

Down

- 1. An ancient super continent containing all of Earth's landmasses
- 2. A cycle of heating , rising, cooling, and sinking
- 3. A break in Earth's crust due to movement
- 4. Where one plate sinks below another
- 7. Type of boundary between two plates sliding past each other
