

Name: _____

Date: _____

Plate Tectonics

Across

- 2. A mountain ridge along the ocean floor.
- 3. Two tectonic plates that move past each other horizontally.
- 4. Magma that reaches the Earth's surface is called.
- 8. The liquid part of the mantle.
- 11. What is between the core and the crust.
- 12. The location within Earth where an Earthquake starts.
- 14. A deep valley on the ocean floor.

- 16. The inner most part of the Earth.
- 17. A large break in a rock.
- 19. A type of current in the mantle.
- 20. Two plate tectonics that collide.

Down

- 1. Something that makes the earth shake.
- 5. Plates that move away from each other.
- 6. An instrument that measures and records ground vibrations.

- 7. A part of the crust and uppermost part of the mantle that moves over Earth's surface.
- 9. The pulling of tectonic plates due to gravity and abduction.
- 10. A geohazard that erupts.
- 13. The Vibration caused by the release of energy during an Earthquake.
- 15. The outer most part of the Earth.
- 18. The name of a super continent that existed a long time ago.
