

Plate Tectonics

Across

6. Another way of saying "moving apart".
7. Where one plate moves under the other.
8. Undersea mountain ranges that form when plates pull apart.
9. Where plates slide past each other.
10. Large cracks in earth's crust.

Down

1. Another way of saying "come together"
2. Tectonic plates move because of this. (Hint: heating and cooling)
3. Where edges of the plates meet.
4. A theory stating that the earth's surface is broken into plates that move.
5. A ring shaped belt of volcanoes and earthquake activity in the Pacific Ocean.
