

Plate Tectonics

Across

7. What boundary goes towards each other?

12. Super continent

13. What causes the plates to move?

14. Caused by divergent boundaries

15. Crust sinks back into the mantle

17. Crust bends downwards

18. How far the plates move each year(no label)

19. Boundary where the plates move away from each other

20. First started the theory of Pangaea

Down

1. Caused by transforming boundaries

2. Mountain chains on the ocean floor

3. One of the pieces of evidence by Wegener (Continents)

4. Caused by convergent boundaries (continental-continental)

5. Where subduction takes place

6. Caused by convergent boundaries (oceanic-oceanic)

8. Boundaries where plates slide past each other

9. One of the pieces of evidence by Wegener (weather)

10. One of the pieces of evidence by Wegener (plants and animals)

11. Oceanic crust is more/less dense than continental crust

16. One of the pieces of evidence by Wegener (Continents)
