

Plate Tectonics

Across

3. Overall, which seismic waves are the most destructive
4. The adjustments of materials that follow a major earthquake often generate smaller earthquakes called
6. The center of an earthquake
7. What is the minimum number of seismic stations that is needed to determine the location of an earthquake's epicenter
9. A fracture in the Earth where movement has occurred

10. The slow continuous movement that occurs along some fault zones is referred to as

Down

1. Which seismic waves travel most rapidly
2. What instrument records earthquake waves
5. Major earthquakes are sometimes preceded by smaller earthquakes called
8. Most earthquakes are produced by the rapid release of what kind of energy stored in rock subjected to great forces
