

Plate Tectonics

Across

3. Convergent boundaries are created when two plates _____

5. The upper part of the mantle

9. The crust is split into _____ plates

11. A famous transform boundary, the _____ Andreas Fault

12. Type of boundary when two plates spread apart from each other

14. The lithosphere contains the crust and very top of the _____

15. The study of the magnetic field of the earth over time

Down

1. _____ currents cause the plates to move

2. The scientist who thought of continental drift, _____ Wegener

4. A natural disaster created by a transform boundary

6. The inner core and the crust are both _____

7. There are two types of crust; continental and _____

8. Used as evidence for continental drift

10. The surface of the earth

13. What the mantle is made of
