

Plate Tectonics

Across

4. proposed convection currents

9. same glacier patterns on different continents

13. build up of water vapor

14. proposed continental drift

15. "plastic behavior"

18. unstable atoms

19. plates slide past

20. "plates" that are in constant motion

21. seafloor spreading

Down

1. areas where fluid beneath the Earth's crust rise

2. the denser crust

3. made of lower density rock

5. proposed convection currents

6. sinks

7. the study of past climates

8. composed mostly of nickel and iron

10. solid or hard

11. plates away towards

12. geologists

16. all were together

17. plates move away
