

Plate Tectonocs

Across

7. Breaks in the Earth's crust.

8. Large pieces of Earth's crust separated by faults or boundaries.

9. Soft layer of rock in the upper part of the mantle

11. Extinct animal that lived on Pangea.

12. Molten layer of rock between the outer core and the crust.

13. The idea that pieces of Earth's crust move in relation to each other.

Down

1. Earth's climate millions of years in the past.

2. Molten rock under the Earth's surface

3. Extinct plant that grew 300 million years ago.

4. Soft layer of rock in the upper part of the mantle.

5. Large sheet of ice on the Earth's surface.

6. Heat transfer through a fluid.

10. Super continent that existed 250 million years ago.
