

# Plate margins

## Across

- 2. A mountain that contains magma
- 5. Crust that is part of the bottom of the ocean.
- 8. A natural hazard caused by the release of pressure built up between to plates.
- 9. The name we give magma when it has erupted from a volcano.
- 10. The plate margin where two plates move past one another.

## Down

- 1. The repeating process by which a liquid is heated and rises, then cools and sinks.
- 3. The plate margin where two plates move towards each other.
- 4. Crust that is part of land masses.
- 6. The plate margin where two plates move away from each other.
- 7. The semi-molten rock in the Mantle.
