# Points, Lines & Planes

## Across

6. points that do not lie on the same line
7. a flat surface that continues infinitely in all directions
8. an object with no thickness that extends infinitely in two directions
9. part of a line consisting of one endpoint and extending infinitely in one direction

10. rays that share a common endpoint, but continues infinitely in opposite directions

## Down

1. points that do not lie on the same plane
2. points that lie on the same line
3. an exact location in space with an indefinite shape and size
4. part of a line consisting of two endpoints and all the points in between
5. points that lie on the same plane
