

Polymers

Across

5. what are the weak forces in a polymer?
7. what gas is given off to make nylon
8. what is the reaction called that always releases gas in the reaction?
9. what is the type of polymer that plastic bags are made out of?

Down

1. what makes up a polymer?

2. a polymer used in tyres
3. something they use in one of the types of reactions to form the polymer
4. what are the strong bonds called?
6. What is the reaction called that that has no sub-products? (only the polymer is formed)
10. at what pressure does the
A _____ reaction take place at?
