

# Polynomials

## Across

**1.** Name for a one term polynomial.

**4.** What is the first step in adding/subtracting polynomials?

**7.** The number in front of a variable.

**9.** The coefficient of the highest degree term.

**11.** Name of  $f(x)$  by number of terms.

**12.** Constant of  $f(x)$ .

**13.** Standard form requires degrees of terms be in \_\_\_\_\_ order.

## Down

**2.** Name for a 2 term polynomial.

**3.** The degree of a polynomial is the highest \_\_\_\_\_.

**5.** Leading coefficient of  $f(x)$ .

**6.** Degree of  $f(x)$ .

**8.** Name for a 3 term polynomial.

**10.** A term without a variable is a \_\_\_\_\_.
