

Population Dynamics

Across

5. A group of individuals of the same species living in a particular place.
6. Live long lives, mature slowly, and stay at carrying capacity.
7. The rapid increase of a population.
8. Limit how much the population can grow.
9. It does not matter how large or small the population is.

10. Depend on how many organisms are in an area.

Down

1. Short life span, small in size, and reproduce rapidly.
2. Organisms moving out of an area.
3. The maximum population size an environment can support for a long period of time.
4. Organisms moving into an area.
