

Population Dynamics Biology

Across

- 1. What is it called when you notice a populations pattern increase?
- 4. What is it called when a large number of individuals is added to the population?
- 7. What is the amount of species in an area called?
- 8. What can cause a population to decrease
- 9. What is it called when a population is at its highest?

10. What causes an areas population to decrease?

11. What causes a population to grow? (3)

Down

2. What can cause a population to decrease? (4)

3. What is it called when key points in the environment lead to population decrease?

5. What can affect a population's environment?

6. What causes a population to grow? (2)
