

# Population dynamics

**Across**

- 4. A large number of individuals is added to the population each generation
- 5. What cause population to decrease?
- 6. Organisms moving out of an area.
- 7. What is group of individuals of the same species living in a particular place?
- 9. What identifies in exponential growth graph
- 10. The maximum population size an environment can support for a long period of time

- 11. What cause population to grow?

**Down**

- 1. Has a short lifespan, small in size, reproduce rapidly
- 2. Depends on how many organisms are in that area
- 3. It does not matter how large or small the population is
- 8. Resources that limit the growth of population.
