

Population ecology

Across

3. a group of population occurring in a particular area

5. Death rate

8. Population ... number of individuals of a population per unit area

9. Movement out of area

10. Density ... factors in density increase

11. Communities interacting with each other

13. A group of organisms with similar characteristics

Down

1. External factors

2. Move into an area

4. Density ... factors is limit the size of population

6. Birth rate

7. The environment where species occurs

12. Population total number of individuals
