

# Primates

## Across

2. An animal or person that eats food of both plant and animal origin.

6. Carefully picking through hair or fur looking for insects, twigs, and other debris. This is common behavior for primates

8. An animal that feeds on plants.

9. A medium-sized, chiefly forest-dwelling Old World monkey that has a long face and cheek pouches for holding food.

11. A large Old World ground-dwelling monkey with a long doglike snout, large teeth, and naked callosities on the buttocks.

12. A term referring to North, Central, and South America. By comparison, the Old World refers to Europe, Africa, and Asia.

14. Ring-tailed primate of Madagascar

15. The biological order that includes humans, monkeys, apes, and prosimians.

## Down

1. A chimpanzee with a black face and black hair, found in the rain forests of the Democratic Republic of Congo

3. Man's closest kin, African ape with advanced intelligence.

4. A large mainly solitary arboreal ape with long reddish hair, long arms, and hooked hands and feet, native to Borneo and Sumatra.

5. A term referring to the ability to walk and run on two feet. By comparison, four footed animals are quadrupedal.

7. A powerfully built great ape with a large head and short neck, found in the forests of central Africa. It is the largest living primate.

10. A large primate that lacks a tail, including the gorilla, chimpanzees, orangutan, and gibbons.

13. A South Asian prosimian in the superfamily Lorisioidea. They are slow, cautious climbers and creepers on forest branches. They have unpleasant tasting poisonous saliva that they lick onto their fur
