

# Privacy and Security in the HIE

**Across**

- 3. Access control policies need to be identified to ensure \_\_\_\_\_ of EHR Systems.
- 4. There are different types of \_\_\_\_\_ control that can be implemented such as RBAC, ABAC, and CAC.
- 6. In 2009, the HITECH Act provided almost \$600 million federal funds towards HIE \_\_\_\_\_.
- 8. Providers can easily access prior lab results and testing through HIEs which will prevent \_\_\_\_\_.
- 9. HIE participation is largely related to the option to meet \_\_\_\_\_ state-2 requirements.

- 10. Patients and providers are concerned about \_\_\_\_\_ and security in the HIE.

**Down**

- 1. Firewalls are an example of a secure communication channel that can be used before information \_\_\_\_\_ takes place.
- 2. Personal health records allow patients to have complete and total \_\_\_\_\_ over their information.
- 5. EHR implementation should always follow \_\_\_\_\_ guidelines.
- 7. It is very important for staff to be trained on HIE \_\_\_\_\_.
