# Producers Consumers Decomposers

## Across

4. An organism that breaks down dead or decaying organisms
5. An organism that eats plants and animals
7. An organism that only eats plants
8. Organism that feeds on plants or other animals for energy
9. any of a large group of organic compounds occurring in foods and living tissues and including sugars, starch, and cellulose.
10. The compacity or power to do work

## Down

1. a member of a large group of unicellular microorganisms that have cell walls but lack organelles and an organized nucleus
2. An autotrophic organism capable of producing complex organic compounds from simple inorganic molecules through photosynthesis
3. Energy source is eating other consumers
6. the process by which green plants and some other organisms use sunlight to synthesize foods from carbon dioxide and water.

## Word Bank

Producers	Photosynthesis	Energy	Omnivore
Consumers	Bacteria	Herbivore	Carnivore
Carbohydrate	Decomposers
