

Properties of Matter

Across

- 1. two or more elements joined in a fixed proportion
- 3. an aggregate of two or more substances that are not chemically united and that exist in no fixed proportion to each other.
- 5. the tendency of a liquid to resist flow
- 7. a substance ability to catch fire, combustible
- 9. smallest component of an element

- 11. composed of parts or elements that are all the same
- 13. composed of different substances
- 14. a substance's ability to transfer/ transport electricity
- 15. a substance's ability to be hammered into thin sheets
- 16. a homogeneous, molecular mixture of two or more substances

Down

- 2. a solid that forms from two or more liquids
- 4. evaporation and subsequent condensation of a liquid
- 6. process of removing suspended substances from a liquid
- 8. simplest form of matter
- 10. the ability of substance to combine with other substances
- 12. the state in which the particles of a substance are mixed with a fluid but are undissolved
