

# Properties of Water

## Across

5. Water is tasteless and \_\_\_\_\_?

7. Water is a liquid at standard temperature and \_\_\_\_\_?

10. What type of bond do the molecules have that form water?

13. What makes water molecules hold on to other water molecules?

14. Is water an acid or a base?

15. How much of the human body is made of water?

## Down

1. What is the boiling point of water?

2. What two atoms are bonded together to form water?

3. How much of the Earth is covered in water?

4. Water's ability to form hydrogen bonds makes it have \_\_\_\_\_?

6. How much of the water is fresh water?

8. Water is a universal \_\_\_\_\_?

9. What is the densest form of water?

11. What makes water molecules hold onto molecules of a different substance?

12. How many atoms of Hydrogen are in each molecule of water?
