

Protein Synthesis

Across

2. copies the genetic instructions from DNA in the nucleus

5. change in base sequence of DNA or RNA

9. step of protein synthesis that takes place in the ribosome

10. organelle where DNA is found

12. organelle where proteins are made

13. Step of protein synthesis that takes place in the nucleus

Down

1. the process which proteins are made

3. brings amino acids to the ribosome

4. building block or monomers of protein

6. three letter code words

7. sequence of Nitrogen bases in DNA

8. anything that causes a mutation

11. helps form the ribosome
