

Psycho Biology Chapters 8- 13

Across

2. Keeping regulation of biological processes within normal range. nctions
9. Disorder marked by sudden daytime sleepiness
10. follicle-stimulating hormone Abbr.
11. A genetic disorder that disrupts the blood's ability to clot.
12. Difficulty getting or staying asleep.
20. An enzyme to break down lactose.
21. Rapid eye movement sleep. Abbr.
22. A special protein on cell surface that is destroyed if not recognized by Immune system.
24. diazepam-binding inhibitor Abbr.
27. White blood cells; made in bone marrow
29. Congenital adrenal hyperplasia Abbr.
30. Hair-like.
33. An adjective describing thinking, will or intellect.
35. Sex glands
36. Post-traumatic stress disorder. Abbr.
37. long-term depression Abbr.
38. Neuroleptic drugs. Used to treat schizophrenia. Primarily block dopamine receptors.
39. Another name for estrogen.
41. Hormone made in fat cells.
45. A type of brain wave pattern associated with being awake

46. To heed, focus thought or concentrate.

48. Face recognition

Down

1. Accumulation of fluid in extracellular tissue.
3. Self-identification as male or female.
4. Seizure disorder, usually treatable with drugs.
5. Inability to have an erection.
6. Major connections with the hippocampus and thalamus.
7. A complex emotion. A combination of uncertainty, fear and uneasiness.
8. A reflex Similar to Pavlov's conditioned reflex.
13. Synthetic opioid used to treat heroin addiction.
14. hypothalamic-pituitary-adrenal axis Abbr.
15. An eating disorder; binge-purge
16. NNeuroleptic drugs. Primarily block dopamine receptors.
17. Class of drugs used to treat anxiety, seizures and insomnia
18. The Primary stress hormone released from adrenals.
19. Damage to both hemispheres of the brain.
23. Ambiguous genitalia, or genetic sex and genitals don't match.
25. The retrieval part of memory
26. Another name for desynchronization.
28. The belief that knowledge comes from experience

31. The slow brain wave pattern associated with deep sleep.

32. Any chemical or hormone that stimulates male development or characteristics. Male hormones; testosterone is best known.

34. Surgical removal of portions of the brain.

40. Sugar found in cow milk.

42. long-term memory Abbr.

43. Central nervous system. Abbr.

44. Similar to B cells but T cells don't circulate in the blood.

47. behavioral inhibition system. Abbr.
