

Name: _____

Date: _____

Puzzled

Across

- 5.** The average of the value in the data set
7. The value that affects the outcome of the dependent variable
9. An arrangement of two-dimensional figures that fold to form a polyhedron
10. The most frequent value
11. The sum of the area of the faces of a solid figure
14. Multiplying a sum by a number is the same as multiplying each addend by the number then adding the products
16. Containing ten parts
18. A plane formed by a horizontal line (x-axis) that intersects a vertical line (y-axis)

- 19.** A question that anticipates variability in the data that would be collected to answer the question
20. The process for evaluating expressions

- 21.** The value in a problem that is affected by the other values in a problem

Down

- 1.** A set of rules or a method that you use to solve a problem
2. The greatest factor that two or more numbers have in common
3. The middle value when the data is ordered from the smallest to largest
4. The number of cubic units needed to occupy a space
6. A pair of numbers that can be used to locate a point on the coordinate plane

- 8.** The ratio of a number to one-hundred

- 12.** A ratio that compares two quantities having different units of measure

- 13.** The number of square units needed to cover a given surface

- 15.** A closed plane figure formed by three or more straight sides that are connected by line segments

- 17.** A rate that has one unit as its second term
