

# Quadrilaterals and Triangles

## Across

5. a 4-sided figure with 2 pairs of congruent parallel sides  
 6. 4-sided figure  
 10. a triangle with a right angle  
 12. equal  
 13. a 4-sided figure with 2 pairs of congruent parallel sides and 4 right angles

## Down

1. a triangle with 2 equal sides  
 2. 4-sided figure with 2 pairs of parallel sides  
 3. a 4-sided figure with 1 pair of parallel sides  
 4. a triangle with all equal sides  
 7. a triangle with all acute angles

8. a 4-sided figure with 2 pairs of parallel sides and 4 right angles  
 9. a triangle with all different sides  
 11. a triangle with one obtuse angle
