

# Ratios, Rates, and Proportional Reasoning

**Across**

- 2. Proportion can be written in \_\_\_\_\_ form.
- 7. \_\_\_\_\_ - \_\_\_\_\_ - \_\_\_\_\_ ratio compares one part of a group to the whole group.
- 8. A rate can not expressed as a \_\_\_\_\_ because it is a ratio that compares quantities expressed in the same units.
- 10. \_\_\_\_\_ is a relationship that says two ratios or two rates are equal.

**Down**

- 1. \_\_\_\_\_ - \_\_\_\_\_ - \_\_\_\_\_ ratio compares different parts of a group to each other.
- 3. A unit rate is sometimes called a \_\_\_\_\_ rate .
- 4. A rate can be expressed as a fraction that includes the two \_\_\_\_\_ units.
- 5. \_\_\_\_\_ compares two quantities measured in different units.
- 6. Two-term ratio compares two quantities measured in the \_\_\_\_\_ units.
- 9.  $3:5 = 24:$  \_\_\_\_\_
