

Regulation of Gene Expression

Across

5. tryptophan
9. breaks down protein
10. stringy material
14. mutations that are added or deleted
15. nucleotide
18. binding proteins
19. expressions of genes
20. many mutagens

Down

1. lysosomes
2. regulates accessibility
3. grouped on a chromosome
4. mammalian females
6. bases change in DNA
7. mutations abnormalities

8. located from the promoters
11. works
12. not transcribed
13. fix any irregularities
16. induced mutations
17. exposure to toxic
